### Introduction

The UK GDPR (the retained EU law version of the General Data Protection Regulation ((EU) 2016/679), as it forms part of the law of the United Kingdom by virtue of section 3 of the European Union (Withdrawal) Act 2018) bestows a range of rights upon individuals. Individuals have the following rights, as set out in Chapter 3 (Articles 12-23) of the UK GDPR:

- The right to be informed about the collection and use of their personal data;
- The right of access to their personal data;
- The right to rectification of inaccurate or incomplete personal data (in certain circumstances);
- The right to have their personal data erased or destroyed and profiling (where this is carried out);
- The right to restrict or suppress their personal data;
- The right to data portability of their personal data;
- The right to object to the processing of their personal data (in certain circumstances);
- Rights in relation to automated decision making and profiling (where this is carried out).

These Guidance Notes focus on the right to obtain a copy of their personal data and the right to obtain confirmation that you are processing their personal data and other information that essentially matches that which you have provided in your privacy notice or policy.

### Article 15 UK GDPR

1. The data subject has the right to obtain from the controller confirmation as to whether or not personal data concerning him or her are being processed and, where that is the case, access to the personal data and the following information:
  - a) the purposes of the processing;
  - b) the categories of personal data concerned;
  - c) the recipients or categories of recipients to whom the personal data have been or will be disclosed, including recipients in third countries or international organisations;
  - d) where possible, the envisaged time limits for which the personal data will be stored, or the criteria used to determine that period;
  - e) the existence of the right to request the controller rectification or erasure of personal data concerning him or her, or restriction of the processing of personal data concerning him or her, or to object to such processing;
  - f) the right to lodge a complaint with a supervisory authority;
  - g) where the personal data have been disclosed to third parties, the existence of an obligation to inform those third parties of the erasure or restriction of the personal data, or the existence of such an obligation, taking into account any available technical means and the cost of such measures;
  - h) the existence of automated decision making, including profiling, on a significant scale, referred to in Article 22(1), and, at least in those cases, the right to object to such processing.

S

2. Where personal data is transferred to an international organization, the data subject shall be informed of the transfer and the recipient, and of the rights regarding the transfer.
3. The controller shall provide the data subject with access to the personal data undergoing processing. For any request, the controller may charge a reasonable fee based on administrative costs. Where the request is made by electronic means, and unless the controller has otherwise agreed, the information shall be provided by electronic means.
4. The right to obtain access shall not adversely affect the rights and freedoms of others.

a third country or to an international organization shall have the right to be informed of the transfer, and of the recipient, and of the rights regarding the transfer, pursuant to Article 46.

personal data undergoing processing. For any request, the controller may charge a reasonable fee based on administrative costs. Where the request is made by electronic means, and unless the controller has otherwise agreed, the information shall be provided by electronic means.

in paragraph 3 shall not adversely affect the rights and freedoms of others.

A request to exercise the right of access is usually known as a “**data subject access request**” or “**SAR**”. It will often be abbreviated further to the acronym “**SAR**” throughout these Guidance Notes.

ect is usually known as a “**data subject access request**”. It will often be abbreviated further to the acronym “**SAR**” throughout these Guidance Notes.

The purpose of a SAR is to ensure that you are aware of your personal data, what you are using it for, and if you are doing so lawfully.

and out if you are using their personal data, what you are using it for, and if you are doing so lawfully.

S

## Part 1. What to Provide in Response to a Subject Access Request?

The information required in response to a SAR is set out in full in Article 15 of the UK GDPR (see above).

- Firstly, the data subject is asking for their **personal data**. Not all SARs are for personal data. If you do not have personal data about the data subject, you should inform them of this.
- Secondly, if you do have personal data about the data subject, they are entitled to a **copy of their personal data**.
- Thirdly, the following information should be provided (the information you should also provide in your privacy notice, privacy policy, or similar):
  - The purpose(s) for which the personal data is being processed;
  - The category or categories of personal data to which the request relates;
  - Any recipients or categories of recipients to whom you disclose the personal data;
  - Your retention period for the personal data or, if you do not have fixed retention periods, the longest period for which the personal data will be kept;
  - Details of the following rights:
    - to request rectification;
    - to erasure;
    - to the restriction of processing;
    - to object to processing;
  - Details of the individual to whom the personal data is being disclosed;
  - If the personal data is being disclosed to a third party rather than the individual data subject themselves, details of that source;
  - Details of any automated decision making (including profiling) carried out using the personal data;
  - Where personal data is transferred to a “third country” (one outside the UK) or to an international organisation, details of the safeguards in place. (Note that, for part of the EEA. Personal data transfers to the EEA are permitted and, under transitional provisions in the EU-UK Trade and Cooperation Agreement, personal data transfers from the EEA to the UK will also continue during the “specified period” set out in the agreement.)

When providing personal data to a data subject in response to a SAR, it is important to remember that they are **only entitled to their personal data**. This means that, **unless the individual is acting on someone else's behalf**, information relating to other individuals should not be disclosed.

### Identifying Personal Data

At this point, it may be useful to refer to the definition of personal data. The UK GDPR's definition can be found in Article 4(1):

‘personal data’ means any information relating to an identified or identifiable natural person (‘data subject’); an identifiable natural person is one who can be identified, directly or indirectly, by reference to an identifier such as a name, an identification number, location data, an online identifier or other information specific to that natural person, including physiological, genetic, mental, economic, cultural or social identity.

S

## Part 2. How to Recognise a Subject Access Request

There is **no prescribed form for a SAR** and it **can be sent to anyone within your organisation**. You may receive a formal letter, addressed to you or your Data Protection Officer, as a data subject access request. You might also receive a message on social media from a person claiming to be you.

The words “subject access request” are not always consistent. For example, more general terms like “personal information” or “data” may be used. While there is no prescribed form, in order to respond to a SAR, this information must be provided in the first instance. You might be mentioned in a two-way conversation about information your company has about you.

Anybody within your organisation can receive a SAR. It is important to **ensure that all staff** are aware of how to handle contact with individuals outside the organisation in the course of their work.

### Training and Policies

Training is important, not only when it comes to handling them. Anyone within your organisation who is likely to receive a SAR should receive at least some basic training, but those responsible for responding to them, such as Data Protection Officers, HR managers and the like could benefit from more comprehensive training. **many SAR training courses contribute to CPD requirements**.

A **Subject Access Request Policy** is a useful document. Key ingredients of such a policy might include:

- Details of who is responsible for handling SARs (e.g. your Data Protection Officer);
- How to recognise a SAR;
- What to do when a SAR is received;
- How to respond to a SAR (including time limits, locating information, and how to refuse to comply);
- When and how to refuse to comply.

### Providing a Subject Access Request Form

While you may not force data subjects to use a specific method or form, you can invite them to do so. One way to do this is to provide a standard form. Not only does this make it easier for you to spot an incoming SAR, but it also makes it easier for data subjects to provide the required information.

Particularly if you are processing personal data electronically, enabling individual data subjects to make SARs electronically is a good idea. Recital 59 of the EU GDPR states that “The controller should encourage requests to be made electronically, especially where personal data are processed electronically.”

Always remember, however, that individuals have the right to use any method they wish to make a SAR and it remains important to provide a standard form if you provide one.

A

M

P

L

E

to be made in writing. Moreover, it can be made by any means. You may, therefore, receive a SAR from a Data Protection Officer, that clearly identifies itself as a SAR. You might receive a short, informal message (but not by text) about their personal data.

Terms like “personal information” may not be as precise as “personal data”. You, as the data controller, need to ensure that the information to be provided in the first instance is clear. The words “Please tell me what information you have about me” are not a SAR.

Anybody can receive a SAR by any means. It is particularly important for those who have regular contact with individuals outside the organisation (customers or prospective employees) to be aware of this.

Providing a standard form for SARs but also when it comes to handling them. Anyone within your organisation who is likely to receive a SAR should receive at least some basic training, but those responsible for handling SARs and HR managers and the like could benefit from more comprehensive training. **many SAR training courses contribute to CPD requirements**.

A **Subject Access Request Policy** is a useful document. Key ingredients of such a policy might include:

- Details of who is responsible for handling SARs (e.g. your Data Protection Officer);
- How to recognise a SAR;
- What to do when a SAR is received;
- How to respond to a SAR (including time limits, locating information, and how to refuse to comply);
- When and how to refuse to comply.

While you may not force data subjects to use a specific method or form, you can invite them to do so. One way to do this is to provide a standard form. Not only does this make it easier for you to spot an incoming SAR, but it also makes it easier for data subjects to provide the required information.

Particularly if you are processing personal data electronically, enabling individual data subjects to make SARs electronically is a good idea. Recital 59 of the EU GDPR states that “The controller should encourage requests to be made electronically, especially where personal data are processed electronically.”

Always remember, however, that individuals have the right to use any method they wish to make a SAR and it remains important to provide a standard form if you provide one.

### Part 3. Providing Personal Data

As stated in the UK GDPR (see [Part 2. Data Subject Requests](#)), where a data subject makes the request by electronic means, and unless otherwise specified, the information shall be provided in a commonly used electronic form. Recitals also recommend that you provide a self-service system, if possible.

#### Recital 63

...Where possible, the controller should provide remote access to a secure system which would allow the data subject to access his or her personal data. This should be done in a way that does not adversely affect the rights or freedoms of others, including those of children.

Particularly in a small business, it may be practical to provide a self-service system like that used by our business and the kinds of personal information used by our business are worthy of consideration.

If the SAR has been made by non-electronic means (for example by letter or verbally), you may respond in any commonly used form (electronic or otherwise), unless otherwise requested. If the data subject requests a written response, it is acceptable to do so, particularly if the amount of personal data is small. In such cases, the ICO recommends that you keep written records of such responses.

**Information should be provided in a concise, intelligible, and easily accessible form, using clear and plain language.** In your SAR response understand the needs of children and the SAR in question.

It may be the case that the personal data requested is mixed with other information including non-personal data. Each piece of information must be considered on its own to ensure that no personal data is disclosed. It is likely that you will need to separate non-personal data from your response unless the data is positive or contentious.

#### Providing Data in a Commonly Used Electronic Form

There is surprisingly little guidance in this context. When dealing with file formats such as CSV, XML, and JSON, the ICO's guidance suggests that you should ensure that it is easy for personal data to be moved from one service to another.

These file formats are likely to be widely used, as they can be easily opened without specific software. CSV and JSON can all be opened on almost any computer or device using a simple stock text editor app. The CSV format is also widely compatible with spreadsheet apps.

It is best to avoid assumptions about what software a particular data subject may have access to. Proprietary file formats should therefore be avoided.

#### When Data Changes Between SAR Requests

Particularly where personal data is updated (or even deleted) regularly, it may be the case that it will change between your receipt of a SAR and your response. The ICO takes a pragmatic approach to this.

It is our view that a subject should be provided with the data held at the time the request was received, unless it is not reasonable for you to do so.

S

A

M

P

L

E

supply information you hold that is different to that held when the SAR was received.

Provided, therefore, that you don't amend or delete personal data in a way that you would not have otherwise done (indeed, it is an offence under the Data Protection Act 2018), you should not need to worry about backtracking SARs as it was when the SAR was received.

#### Explaining the Data

You should not simply dump a lot of data on an individual's lap in response to a SAR. In some cases, the data included will be simple and self-explanatory. In other cases, where the data is more complex, you may need to explain it as part of your response. The ICO, however, explains that it should not be an onerous obligation. For example, "...you are not expected to transcribe or decipher unintelligible written notes."

A

M

P

L

E

S

## Part 4. Time Limits

You must normally respond to a SAR **within one month of receipt**. If you have received a fee (see below in Part 6) or a fee (see below in Part 6) of receipt of those.

### Calculating the One Month Period

How long is one month? The one-month period normally ends on the corresponding calendar day in the following month. For example, if you receive a SAR on 10 January, the one-month period would end on 10 February. If the following month is shorter than the current month, the one-month period ends on the last day of the following month. For example, if you receive a SAR on 31 January, the one-month period ends on 31 February.

This method of calculating your response period can result in lost time or a late response. It is, therefore, good practice to set a deadline internally to 28 days.

There is one small exception to the rule that calendar days, not business days, are what counts. **If the end date falls on a weekend or public holiday, the period ends on the next working day.**

### Extending the Time Limit

If a SAR is complex, or if the same person has made multiple requests to exercise other rights made at the same time, you may be able to extend the time limit by a further two months. If you wish to extend the time limit, you must nevertheless respond to the data subject within the first month of the extended time.

### Complex Requests

Given that the time limits for responding to SARs are strict, it is important to consider whether a request truly is complex. A request that amounts to "complex" will be a SAR that is complex for one data controller might be complex for another, depending on matters such as the availability of resources – both human and technical.

Factors that may be considered when determining whether a request is complex include technical difficulties, specialist work, the need to obtain specialist information, and the need to resolve confidentiality issues. It is important to note that the mere fact that a SAR relates to a large amount of data does not automatically render it "complex". However, if you are seeking clarification – see below);

### Clarifying Requests – Stopping the Clock

In October 2020, the ICO made a guidance on responding to SARs. Previously, if additional information was requested from the data subject to clarify a SAR, the one-month time limit did not pause. **The time limit for responding to a SAR does not pause if you receive clarification from the data subject to clarify a SAR, the time limit does not pause.** This has now changed. **If you receive clarification from the data subject to clarify a SAR, the time limit does not pause.** Unless and until you receive the necessary clarification, you do not need to provide them with any supplementary information that you cannot reasonably provide.

day" and, at the latest, **within one month of receipt**. If you have received a fee (see below in Part 6) of receipt of those.

S

## Part 5. Fees

Under the old Data Protection Act, it was permissible to charge a fee for the handling of a SAR. Since the Data Protection Act 2018 came into effect, however, this is no longer the case.

**Fees cannot be charged for non-complex or excessive** (for details, please see the ICO guidance) or if a data subject requests their personal data following your response to a SAR, you can charge a fee to cover your administrative costs.

If you are charging a fee, you must inform the data subject as soon as possible to inform them. You do not need to continue to provide the information until you receive the fee. Data subjects should be given a reasonable time to respond. As with requests for clarification, a month might generally be considered "reasonable", but it will turn on the specific circumstances of the SAR. The ICO, it may also be "generally reasonable to close the request if you do not receive a response within one month...", but note the qualifier: "...although what is reasonable depends on the circumstances".

Always remember, however, that the fee must be **your true administrative costs**, and you must take these into consideration when calculating the fee.

- The administrative costs of:
  - assessing whether the request is complex or excessive;
  - locating, retrieving and reviewing the information;
  - providing a copy of the information;
  - communicating the information to the individual to inform them of their right to object (even if you are not required to do so).
- A reasonable fee may also include:
  - photocopying, printing and postage costs;
  - transferring the information to a secure platform to make the information available to the individual;
  - equipment and supplies;
  - staff time.

When requesting a fee, you should provide a copy of your criteria for charging fees to the data subject and include a copy of your criteria for charging fees.

You should also inform the individual of their right to complain to the ICO and their right to seek to enforce their right of access.

A

M

P

L

E

It is permissible to charge a fee for the handling of a SAR under the old EU GDPR (and now UK GDPR) but only in respect of some limited exceptions.

A request is "manifestly unfounded" if the data subject can also refuse to comply in such cases. You can also refuse to provide their personal data following your response to a SAR, you can charge a fee to cover your administrative costs.

If you are charging a fee, you must inform the data subject as soon as possible to inform them. You do not need to continue to provide the information until you receive the fee. Data subjects should be given a reasonable time to respond. As with requests for clarification, a month might generally be considered "reasonable", but it will turn on the specific circumstances of the SAR. The ICO, it may also be "generally reasonable to close the request if you do not receive a response within one month...", but note the qualifier: "...although what is reasonable depends on the circumstances".

Always remember, however, that the fee must be **your true administrative costs**, and you must take these into consideration when calculating the fee.

- The administrative costs of:
  - assessing whether the request is complex or excessive;
  - locating, retrieving and reviewing the information;
  - providing a copy of the information;
  - communicating the information to the individual to inform them of their right to object (even if you are not required to do so).

A reasonable fee may also include:

- photocopying, printing and postage costs;
- transferring the information to a secure platform to make the information available to the individual;
- equipment and supplies;
- staff time.

When requesting a fee, you should provide a copy of your criteria for charging fees to the data subject and include a copy of your criteria for charging fees.

You should also inform the individual of their right to complain to the ICO and their right to seek to enforce their right of access.

S

## Part 6. Requesting More Information

After receiving a SAR, you may not always be able to respond to it. This may also extend to you if you request proof of identity or if you need to confirm the identity as possible. The ability to do so is not always possible to comply.

It is also important to note that, with the exception of the individual of their right to complain to the ICO, you do not have access through a judicial remedy.

### Requesting Proof of Identity

If you need to confirm the identity of the data subject, you can request additional information from them. However, you must be careful not to take to avoid asking for more information than is necessary. In particular, the ICO warns that you should not ask for more information unless it is necessary”.

If additional information is required, you must provide it as soon as possible. As noted above in Part 5, the time limit for responding to the SAR does not begin until the date on which you receive the information. From there, it runs from the date to corresponding date, as a result of the information you receive from the data subject is not begin until you have received the information.

### Clarifying a Subject Access Request

Particularly if you collect, hold, and process personal data about the data subject (or if it is not clear that the data subject is the one who made the request), you should ask them to clarify their request before you respond. You should ask them to narrow the scope of the request to the information that may help to clarify it and assess whether the request relates to all of the personal data you hold about the data subject. Furthermore, as noted above, you should only ask for clarification if it is actually needed and you are processing the data for a legitimate question.

Even if you are processing a large amount of personal data about the data subject, you do not have grounds for requesting clarification. You must only request clarification if it is necessary to seek clarification through the SAR mechanism.

**What if the data subject responds to your SAR by repeating their original request or by refusing to provide the information?** You must still comply as best you can and respond to the SAR. There will likely be cases where you cannot provide clarification, such as confirmation of the identity of the data subject. It will also be the case where you do not have the information required by Article 17, especially the details of the data subject's request or to object to the processing of the data. In such cases, the ICO states that you should still respond to the SAR.

A

Additional information before you can respond to it. This may not always be possible, but not always. If you need to confirm the identity of the data subject, it is important to do so as quickly as possible. A stalling tactic to buy you more time to respond to the SAR.

When you receive the information, you should inform the data subject of their right to seek to enforce their right of access through a judicial remedy.

When making the SAR, you can request additional information, however, and care must be taken to avoid asking for more information than is actually need for confirmation. In particular, the ICO warns that you should not ask for more information unless it is necessary”.

M

You must inform the individual as soon as possible. As noted above in Part 5, the time limit for responding to the SAR does not begin until the date on which you receive the information. From there, it runs from the date to corresponding date, as a result of the information you receive from the data subject is not begin until you have received the information.

P

Particularly if you collect, hold, and process personal data about the data subject (or if it is not clear that the data subject is the one who made the request), you should ask them to clarify their request before you respond. You should ask them to narrow the scope of the request to the information that may help to clarify it and assess whether the request relates to all of the personal data you hold about the data subject. Furthermore, as noted above, you should only ask for clarification if it is actually needed and you are processing the data for a legitimate question.

Even if you are processing a large amount of personal data about the data subject, you do not have grounds for requesting clarification. You must only request clarification if it is necessary to seek clarification through the SAR mechanism.

L

**What if the data subject responds to your SAR by repeating their original request or by refusing to provide the information?** You must still comply as best you can and respond to the SAR. There will likely be cases where you cannot provide clarification, such as confirmation of the identity of the data subject. It will also be the case where you do not have the information required by Article 17, especially the details of the data subject's request or to object to the processing of the data. In such cases, the ICO states that you should still respond to the SAR.

E

# S

## Part 7. Subject Access Requests

**Third parties can make SARs** on behalf of a client, but it can be made if the individual making the SAR is authorised to do so by a written authority or a power of attorney.

In the absence of evidence, you do not have to contact the individual on whose behalf the SAR is made, so and ask if they wish to make a SAR.

### Responding to a SAR Made on Another Person's Behalf

In most cases, your response to the SAR should be sent to the party that it relates to rather than the party that it relates to. If the data subject is concerned that the data subject's information will be disclosed, it may be preferable to send your response to the SAR on their behalf. It is then up to the third party should they contact you directly in such a situation, provided they are authorised to do so, the response should be sent to them.

### Individuals Without the Mental Capacity to Make a SAR

**The UK GDPR does not deal with** individuals who lack the mental capacity to make a SAR. However, an attorney with the authority to act on behalf of an individual also has the authority to make a SAR on their behalf. This is also touching on other legislation and you should seek specialist advice should be sought.

### SARs Relating to Children

Children have rights under data protection law, but they may be too young to understand the particulars of a SAR. The right of access to their own data will often be exercised on their behalf by a parent or guardian.

If you receive a SAR relating to information about a **child is likely to be mature enough** to understand the child if you can. If, however, you are unable to contact the guardian) to make the SAR on their behalf, you can respond to that party.

The ICO provides the following list of factors to help you decide if the individual is able to understand subject access requests:

- The child's level of maturity;
- The nature of the personal data requested;
- Any court orders relating to the child that may apply;
- Any duty of confidentiality that may apply;
- Any consequences of the disclosure of the data to the child's or young person's welfare, if there have been allegations of abuse.

## Other Person's Behalf

e. This might be a solicitor acting on behalf of a client. The important thing is ensuring that the individual making the SAR is authorised to do so. This authorisation may, for example, be a written authority or a power of attorney.

In the absence of evidence, you do not have to contact the individual on whose behalf the SAR is made, so and ask if they wish to make a SAR.

In most cases, your response to the SAR should be sent to the party that it relates to rather than the party that it relates to. If the data subject is concerned that the data subject's information will be disclosed, it may be preferable to send your response to the SAR on their behalf. It is then up to the third party should they contact you directly in such a situation, provided they are authorised to do so, the response should be sent to them.

## Part 8. When Data Includes

Information to be provided in response to a SAR regarding two employees acting together, or a report written by one employee regarding another. In some cases, it may simply be possible to **redact or otherwise** remove information relating to the data subject making the SAR. In other cases, it may be not be possible to do so.

If the latter applies, the Data Protection Act 2018 (Schedule 2, Part 3, Paragraph 16). **You do not have to disclose information about another individual if:**

- The other individual has given their consent to the disclosure; or
- It is reasonable to comply with the request without disclosing the information.

What, then, makes it “reasonable to comply with the request without disclosing the information”? You must consider all relevant circumstances including:

- The type of information that is requested;
- Any duty of confidentiality owed to the other individual;
- Any steps that you have taken to protect the information;
- Whether the other individual has given their consent; and
- Any express refusal of consent from the other individual.

This decision is a careful balancing exercise between the interests of the individual making the SAR and the individual whose personal data is being requested. Given the risks which may be involved in disclosing the information, it may be advisable to seek legal advice in the event of such a situation.

## Part 9. Data Processors

When you appoint another party to act on your behalf, that party is known as a data processor. Data protection law imposes a number of obligations upon data processors and upon data controllers.

If you, as the data controller, receive a SAR in relation to personal data being handled by a processor, **it remains your responsibility** to respond to that SAR, whether it is sent to you or to the processor. It is important to put suitable contractual arrangements in place (whether as clauses within a processing agreement) to ensure that the processor handles the data correctly.

While it may be more difficult to respond to a SAR when some or all of the data is held by a processor, it is important to note that **the time limit for responding to a SAR does not change**, and the limits (and any extensions) set out previously in the SAR Regulations apply.

## Part 10. Refusing to Comply with Subject Access Requests

Generally speaking, you must comply with SARs in limited circumstances under which you are exempt.

### Exemptions

The Data Protection Act 2018 sets out exemptions from particular parts of the UK GDPR. These typically fall within the scope of these Guidance Notes. If you think that your organisation, specialist advice is to be sought. Exemptions are to be found in the following areas:

- Crime, taxation, law, and public safety
- Regulation, parliament, and public administration
- Journalism, academia, research, and artistic creation
- Health, social work, education, and social care
- Corporate finance, management, and administration
- Negotiations with the individual
- Confidential references;
- References and exams.

### Other Grounds for Refusal

Few of the exemptions set out in the Act are likely to be relevant to the typical SME. The grounds provided in the Act, however, be more relevant. You may refuse to comply with a SAR if it is:

- **Manifestly unfounded;** or
- **Manifestly Excessive.**

According to the ICO, a SAR may be “manifestly unfounded” if:

- the individual clearly has no right of access. For example, an individual has already been provided with the information in return for some form of payment;
- the request is malicious. For example:
  - the individual is making the request to cause disruption;
  - the request is made for the purpose of harassing or causing disruption to a specific employee or employee of the organisation;
  - the individual is making the request to cause disruption to an employee against whom they have serious and genuine concerns;
  - the individual is making the request as part of a campaign of harassment or causing disruption.

This is not, however, a black and white test. Each SAR must be considered on its own merits and in the context of any SARs previously sent malicious or otherwise unreasonable. The question is aggressive in tone.

Referring again to the ICO, whether or not a SAR is “manifestly excessive”, it comes down to whether the request is “clearly or obviously unreasonable”. Consider whether the request is “clearly or obviously unreasonable” when weighed against the costs of complying with it.

## Subject Access Requests

There are exemptions and certain circumstances in which you may refuse.

Exemptions from particular parts of the UK GDPR are thus outside the scope of these Guidance Notes. If you think that your organisation, specialist advice is to be sought. Exemptions are to be found in the following areas:

- Crime, taxation, law, and public safety
- Regulation, parliament, and public administration
- Journalism, academia, research, and artistic creation
- Health, social work, education, and social care
- Corporate finance, management, and administration
- Negotiations with the individual
- Confidential references;
- References and exams.

This is not, however, a black and white test. Each SAR must be considered on its own merits and in the context of any SARs previously sent malicious or otherwise unreasonable. The question is aggressive in tone.

Referring again to the ICO, whether or not a SAR is “manifestly excessive”, it comes down to whether the request is “clearly or obviously unreasonable”. Consider whether the request is “clearly or obviously unreasonable” when weighed against the costs of complying with it.

# S

and burdens of responding to the request should be taken into consideration:

- the nature of the request;
- the context of the request and the relationship between you and the individual;
- whether a refusal to provide the information may cause substantive harm to the individual;
- your available resources;
- whether the request largely overlaps with a request made within a reasonable interval hasn't elapsed; or
- whether it overlaps with or is duplicative of another request for a separate set of information.

A large amount of information does not make the SAR excessive. The SAR and the circumstances surrounding it should be considered as a whole. It may also be appropriate to seek clarification from the individual (see 6, above), and to consider what "reasonable searches" you can still conduct.

As to what a "reasonable interval" means (see 6, above), the ICO suggests considering the following issues:

- the nature of the data – the more sensitive the data, the shorter the interval;
- how often you alter the data. If you are required to respond to the same request twice. However, if the information has changed since the last request, you should inform the individual.

Again, therefore, each SAR must be considered on its own merits, and not automatically condemned to refusal merely because it is from or about the same individual. You must have a good reason for deciding that a SAR is manifestly unfounded or manifestly excessive.

## How to Refuse to Comply with a Subject Access Request

The time limit for responding to a SAR is one calendar month from receipt of the SAR. Even if you are unable to respond to it, explaining why you are refusing to do so, you must still respond to it, explaining why you are refusing to do so.

As when you request a fee or add a condition to a SAR, you should also inform the individual of their right to complain to the ICO and their right to enforce their right of access through a judicial remedy.

# A

The following issues be taken into consideration:

- the relationship between you and the individual;
- whether you can acknowledge if you hold the information;
- whether the request largely overlaps with a request made within a reasonable interval hasn't elapsed; or
- whether it relates to a completely separate set of information (i.e. if it is particularly sensitive; or if the information has changed since the last request).

The SAR and the circumstances surrounding it should be considered as a whole. It may also be appropriate to seek clarification from the individual (see 6, above), and to consider what "reasonable searches" you can still conduct.

As to what a "reasonable interval" means (see 6, above), the ICO suggests considering the following issues:

- the nature of the data – the more sensitive the data, the shorter the interval;
- how often you alter the data. If you are required to respond to the same request twice. However, if the information has changed since the last request, you should inform the individual.

## Part 11. Conclusions

One of the central tenets of modern data protection is transparency. The subject access request is an essential tool for individuals to find out about your collection and use of their personal data.

When you receive a SAR, it should be handled quickly, efficiently, and carefully. If any additional information is required for the SAR, it should be requested as early in the process as possible and should not be delayed.

These guidance notes are designed to provide an overview of the key aspects of SARs and responding to them. Some special cases are not covered. If any of these apply, or if you have any questions about SARs, specialist advice (including from the ICO themselves) should be sought.

The ICO lists the following special cases where additional rules and provisions apply:

- Unstructured manual records
- Credit files;
- Health data;
- Educational data; and
- Social work data.

As with all aspects of data protection, it is important that you document the process before, during and after the SAR. You should have suitable policies and procedures in place to handle SARs and to document your decision-making and procedures along the way. This is particularly important when reaching more contentious decisions such as charging fees or refusing a SAR. You must always be prepared to justify such decisions to the ICO.
